

WEEKLY FUN WITH THE FANTASTIC FOURS!

May 23, 2016

LOOKING AHEAD

This week promises to be a busy one! As our year is nearing its end, the days are full of fun, exploration and excitement. The focus this week will be on the children's portfolios. Every day the children will work on an important page for this book, which is a treasured keepsake of your child's year in the Fours Class.

Our class has a keen interest in bugs, and we will continue to look for bugs both outdoors and on our science table. Our caterpillars are changing daily, and we are so excited to see the transformation! When we left on Friday, most of our caterpillars were at the top of the jar, which is a sign that the next stage is almost upon us: the chrysalis stage!

Tuesday, May 24, is LCD Move-Up Day. For children enrolled for the fall, this day gives them a wonderful opportunity to visit and explore their classroom for next year. They will enjoy making connections in a different setting with both current and new friends. Also on Tuesday, Miss Mary will again visit our school for some musical fun and exercise for the last time this year.

OTHER FUN STUFF

Thank you all for sending your children to school with what they need for our ever-changing weather. Please continue to protect your child by applying sunscreen and bug spray before school each day. As the weather is warmer, please also send your child with a water bottle if he/she is staying for Lunch Bunch. It is so important to stay hydrated!

Please note that on Monday, May 30, there will be no school in honor of Memorial Day. Our last day of school is June 3rd. On that day we will host our annual LCD Art Show. Details coming soon!

Please contact me if you have any questions/concerns.

Thank you so much for sharing your children with me!
